

Letters to the Manager- Requesting that the Environment

Department investigate pollution in Cabinteely

Dear Mr. Vesey,

The following matter was raised with me yesterday. As you can see from the picture above there is considerable pollution occurring in the stream running through the Park housing estate in Cabinteely. A local resident has raised this matter with your department on a number of occasions. Action was taken but the problem has reoccurred. The pollution source has been traced to a building development in the neighborhood. I would be grateful if you could investigate this matter yourself and see what can be done to remedy the situation.

Yours Sincerely,

Eoin Costello
